USB 2.0 HI-SPEED FLASH DRIVE

Just Plug & Play

Performance up to 7MB/s

2 Year Full Warranty

64MB - 256MB

SLIM

USB 2.0 HI-SPEED FLASH DRIVE

The SLIM USB memory is a small, mobile and handy device to store any kind of data or exchange data between computers. Your host computer automatically detects it and you can easily use it as an additional drive.

No adapters or drivers are needed for the latest Operating Systems, like Windows® 2000 and higher, Mac OS 9.0 and higher and Linux 2.4 – just Plug & Play. The SLIM also works without any batteries or separate power supplies. Capacities up to 256MB can be stored. There is no need to carry your Notebook with you, when you have your PRIVATE Storage in your pocket.

To prevent unauthorised data access the memorised data or parts of it may be secured with the Secure Software saved on the device. You can divide the volume into a public and a password protected private area.

Art-No: 401067

* Driver required for Windows® 98 –
